

***Yes, I want to help Manitou Springs continue to improve!***

***I believe that we should focus our efforts on creating a comprehensive parking solution for the entire community. As a stakeholder, I agree in concept to a single organization dedicated to the management of a comprehensive city-wide parking system. I encourage the creation of that organization so that Manitou can begin to implement the basic program components presented to me as a stakeholder... a single organization working on implementation of a multifaceted management solution benefiting residents, the business community and visitors.***

***As a stakeholder in the success of Manitou Springs, I support this program of work and give permission for my name to be published in community outreach documents.***
